Volume II / 2020, Issue 68

ITD Cementation India Limited

A Periodical on "Safety in Construction"

Pen Point

World Environment Day (WED) was first celebrated in 1974 on 5th June. Through WED the United Nations stimulates worldwide awareness of the environment and enhances political attention and action.

BIODIVERSITY

This year the WED theme is "Biodiversity" and the host country is Colombia in Partnership with Germany. Colombia is listed as one of the world's "megadiverse" country and sustaining close to 10% of the planet's biodiversity. Colombia ranks first in bird and orchid species diversity and second in plants, butterflies, freshwater fish and amphibians. The country is a part of the Amazon rainforest and the humid ecosystems of the Chocó biogeographical area. India is among the 17 megadiverse countries in the world with four Biodiversity hotspots such as Western Ghats, Himalayas etc.

Biodiversity is the variability of living things (from plants & animals to fungi & bacteria and the genetic diversity found among them) that makes up life on Earth. It also includes the ecosystems (oceans, forests, mountain environments & coral reefs) housing about 8.0 million species on earth. However, as on date 1.0 million plant & animal species are facing extinction. Every species plays an important role in keeping an ecosystem balanced and healthy. Losses in biodiversity increases spread of infectious diseases. Healthy ecosystems, rich with biodiversity, are essential to human existence. They clean air, purify water, ensure availability of nutritious foods, nature based medicines & raw materials, and reduce the occurrence of disasters.

In our Company, we celebrated WED by taking many initiatives like taking oath for protecting environment, planted saplings, conducted quiz, created awareness amongst all staff, workers and other stakeholders etc.

Next year is a launch for **UN Decade on Ecosystem Restoration (2021-2030)**, intended to massively scale up the restoration of degraded and destroyed ecosystems. Let us all be responsible and do whatever possible to save our mother Earth.

Pravin Panchal

Division wise statistics of Saplings planted & Awareness created amongst people

Division	No. of Saplings Planted	Training Imparted on WED		Oath taken by no of persons
		No of Workers	No of Staff	
1	145	259	99	346
2	532	979	243	1152
3	104	173	75	230
4	181	472	123	750
5	160	711	92	776
Depots	22	58	18	76
Total	1144	2652	650	3330

Few Environmental Achievements at ITD Cem by taking various initiatives

Company has minimized use of energy intensive cement consumption by replacing it with **18283 MT** of Fly Ash.

8637 m² of Green Area developed till date from 2016, as per the Corporate objective & Target.

Energy Savings of **18,956 KWh** Annually by fixing Translucent sheets in the roof of workshops and godowns.

Transplanted & saved **204 trees** from cutting at Mumbai & Bangalore Metro Projects.

Built **5 Stations** with IGBC Platinum ratings at Nagpur Metro Projects.

Bio-composting method developed at Haldia Project - Produced **200 kg.** of compost manure in four months from Kitchen & organic waste

Survival Growth Rate of **100%** achieved for **1890 trees** planted in Haldia Project for Green Belt

"Biodiversity is soul for life, each life is important to it"

Bio-Composting

Introduction:

Decomposition and Stabilization of Solid organic waste material has been taking place in nature ever since life appeared on this planet. Composting is the process of decomposition and stabilization of organic matter under controlled condition. Waste materials that are organic in nature, such as plant material, food scraps and Paper products can be recycled using biological composting and digestion processes to decompose the organic matter. It is biological processes in which micro-organisms mainly fungi, and bacteria convert degradable organic waste into humus like substance. The resulting organic matter is then recycled as mulch or compost for agriculture or landscaping purpose. In addition, waste gas from the process (such as methane) can be captured and used for generating electricity.

The intention of the biological processing in waste management is to control and accelerate the natural process of decomposition of organic matter. There is large variety of composting and digestion methods and technologies varying in complexity from simple home compost heaps, to industrial enclosed vessel digestion of mixed domestic products. Methods of biological decomposition are differentiated as being aerobic or anaerobic methods, though hybrids of the two methods also exist.

Composition:

Organic matter constitutes 35-40% of the MSW generated in India. This waste can be recycled by the method of composting one of the oldest forms of disposal. Apart from being clean, cheap and safe composting can significantly reduce the amount of disposal garbage. Each one ton of wet garbage can yield 200-300 Kg of organic fertilizer. It increases the soil's ability to hold water and make the soil easier to cultivate.

Conditions for Good Compost:

A good compost for composting will comprise of three parts 'Browns' and one part 'Greens'

Brown (Carbon)	Greens (Nitrogen)
<ul style="list-style-type: none"> Dry Leaves and Twigs Dry plant and grass clippings Hay Paper 	<ul style="list-style-type: none"> Grass and plant clippings Fresh Landscape trimmings Vegetables Fruit peels Coffee grounds and used tea powder leaves Egg shells

- **Moisture** composting materials should feel moist but not overly soggy.
- **Temperature** Compost should feel warm to the touch except in the cold winter months.
- **Air** to prevent unpleasant odors that can occur when materials decompose without oxygen, compost should be turned regularly to ensure that air is reaching the center of the pile.

Bio-Composting Practice at ITD Cem Project Site –

The Haldia Project implemented Bio-compost mechanism by using in-house materials to cater the organic waste generated at site from Oct'2019.

Following are details on the composting program:

Preparation of Compost Bin: Two Nos of used Barrel with perforations (for air circulation) was used as the compost bin.

Process for Composting: The Bio-composting process basically involves 3 layers with the composting cycle of 15 days as described below:

1st Layer of soil & vegetables peels

2nd Layers of dry leaves and twigs

3rd Layer of soil, vegetables peels, Shredded paper

Repeat the pattern till 2/3rd of container and keep aside for compost to develop. Pour water occasionally to keep the compost moist. After 3-4 weeks, **odor free Bio-compost is ready**. It was utilized for developing green belt at project site.

Nilesh Penkar

Customer Feedback (Corporate Objective)

Customer’s perception always plays an important role in the improvement process of any organization. In our organization, quarterly customer feedback is taken and score is analysed every six months.

In order to improve further, last year we had identified following three areas and Action Plan was prepared.

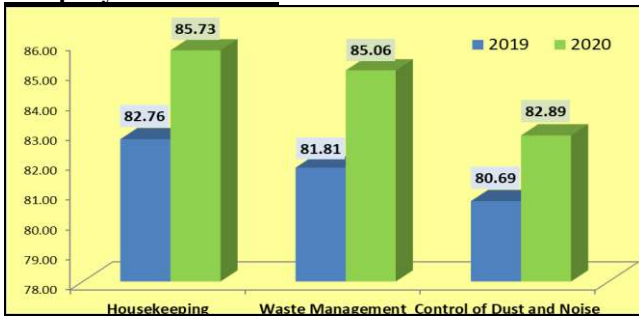

- House Keeping,
- Waste Management
- Control of Dust and Noise

Throughout the year, our team focused and worked hard on improving on these areas. We created awareness amongst staff and workers through Trainings, Inspection checklist was modified and strict monitoring was done. Regular interactions with clients were done to understand their needs & expectations.

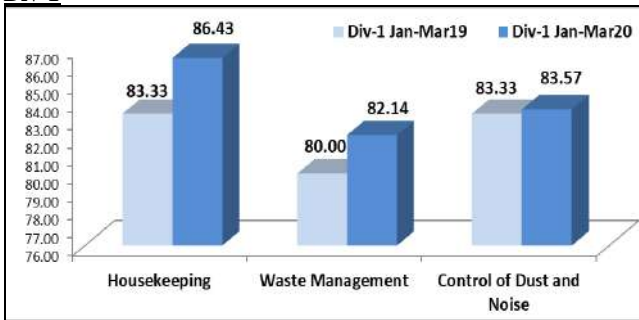

Average yearend ratings on these three areas were analysed and division wise achievement in graphical representation is done here.

The performance of the organization on these three areas-

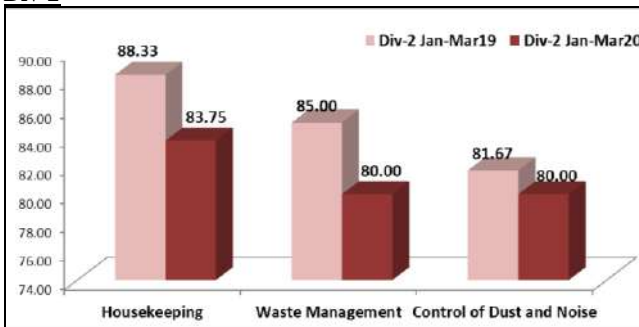

Company Performance:

Div-1

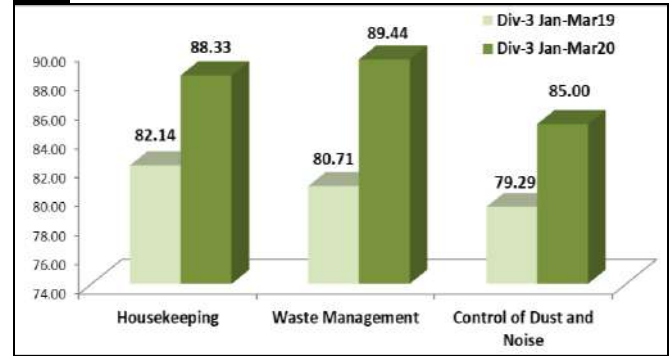

Div-2

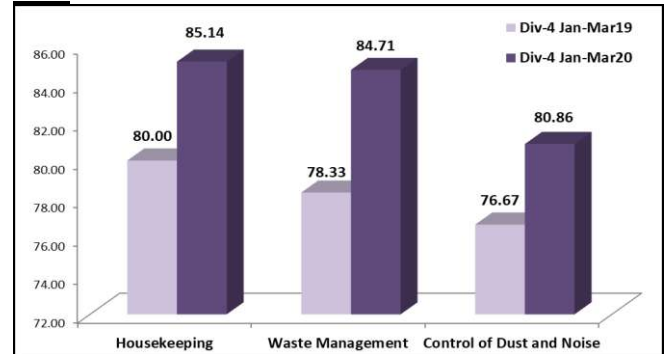

Your most unhappy customers are your greatest source of learning.
— Bill Gates

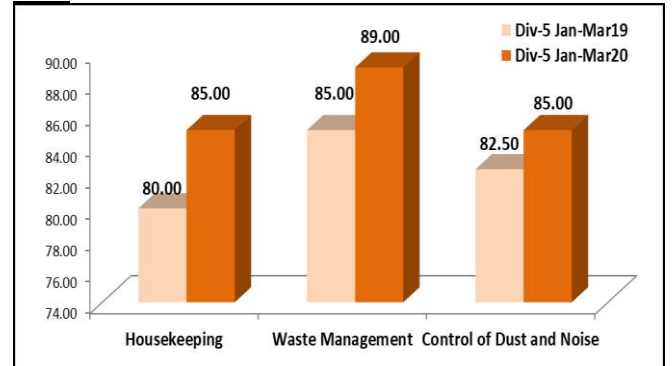

Div-3

Div-4

Div-5

However, over all Customer Feedback for the year 2019-20 of the Organization was **84.6%** as against set target of **85.37%**.

Overall Company Performance (2019-20)

We at ITD Cem, always strive for betterment in our areas covering Quality, Environment & Occupational Health and Safety, which is need of the hour for any Organization’s sustainable growth.

Sub: Appreciation of your efforts to contain COVID-19 outbreak

Dear Sir,
We congratulate you and team at M/ITC for sustained safety performance and initiatives even during the challenging pandemic situation towards the operational works at COVID-19. Various awareness drives, Clearing, disinfection/cleaning of camps and offices, Thermal screening of workmen etc. have been going on since you by your team at respective workstations, which demonstrate your commitment to ensure the Welfare of the workmen and safety as a whole. We are very impressed with your "Proactive and pro-active Hand wash and sanitiser" setup at our workstations, which demonstrates your initiative and commitment towards health & safety. Please keep up the good work and ensure the standards are maintained and improved in future too. "Let's together make this project work safer for all our stakeholders".

Kind Attn: Mr. Dilip Thakur

Dear Sir,
I congratulate you and your team for the initiatives and sustained efforts taken during the challenging situation to contain the spread of Corona Virus (COVID-19). The continuous awareness drives, disinfection/cleaning of camps & offices, regular thermal screening of all workmen etc., carried out by your team at all the workstations, which demonstrate your commitment towards the welfare of the staff & workers and their well-being.

We once again congratulate you & your team and management to rise to the situation. Subsequent to issuing of lockdown with special permission obtained from District Collector, the team under your guidance and leadership have done a wonderful contribution in monitoring the periodic thermal screening of staff/workmen and ensuring everyone follows the instructions as per SOP on COVID-19. We also appreciate your effort in maintaining continuity of work since last 2 months and achieving significant progress even under restraint conditions after complying all guidelines.

There is a need to keep up the good work and standards are maintained to ensure all the staff and workers remain healthy and happy in future too.

Thanking you,

Yours truly,
S. Srinivasan

Thiruchendur-628206

Letter No. CE/SE/Civil/EE/Civil/CJ/E-Coal Jetty/D/27/2020, Dt: 15-06-2020

Dear Sir,
Sub: TANGEDCO - USTPP-Stage-I Establishment of Captive Coal Jetty with unloading facilities and Pipe conveyor for 2x660MW Udangudi Super Critical Thermal Power Project - Udangudi STPP - Appreciation of efforts taken by ITC/CEM to contain the spread of COVID-19 at site and supports provided to residents of local villages adjacent to USTPP through CSR scheme - Regarding.

Ref: Lr. No. CE/Proj/STPP/UP/EE/PHOT No. 03/2014-15/W/0 No. 02/027/2017B. 02.1.06.2018

I would like to appreciate the efforts and Co-operation offered by ITC/CEM for the initiatives taken to support Local community during this Pandemic through your CSR assistance. The pandemic, therefore, may lead to severe economic distress for the poor and those in the informal sector, which also leads to increasing unemployment in the neighboring fishing communities. The relief measures rendered in the form of food materials by ITC/CEM under your CSR assistance scheme to the local fishing community alleviate their immediate requirement through CSR funds.

We once again congratulate you & your team and Management to rise to the situation.

Also appreciating the efforts of ITC/CEM site team for the initiatives and safety measures taken daily to contain the spread of pandemic COVID-19 by way of implementing and maintaining various safety measures at site.

We look forward to this caring attitude & this shall go long way in relationship with local community.

With Kind Regards,
Yours faithfully,
S. Srinivasan
